

CONSERVING THE DIVERSITY
OF GARDEN PLANTS

Suffolk Group

Discover National Plant Collections in Suffolk

Plant Heritage aims to conserve the diversity of our garden plants

We are the only national charity to ensure the cultivated plants we grow now will be available to future generations for cultural, medical, culinary and aesthetic use. We do this through the National Plant Collection scheme, our Plant Guardians and our local group network, supported by our threatened plants programme and Persephone, our online plant recording system.

What is a National Plant Collection?

Put simply, a National Plant Collection is a registered and documented collection of a group of plants. These can be linked botanically by plant group, or perhaps have a shared history or geography. They are held by Collection Holders across the country.

Did you know you can visit individual plant collections?

National Plant Collections are made available for people to view, either by appointment, on special open days or as part of a garden open to the public.

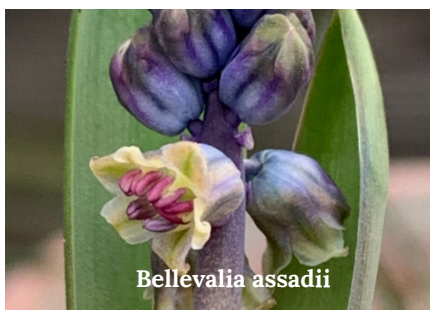

In Suffolk, you will find the full range of collections detailed in this leaflet. If you would like to visit a particular collection, you can make contact with a Collection Holder by using the details supplied.

Aesculus indica

How can I get involved with National Plant Collections?

If you'd like to be involved in garden plant conservation but can only look after one or two plants, why not consider our Plant Guardian scheme.

If you want to support the National Plant Collections and hear more about the work of a particular collection, consider Sponsoring the National Collections.

Could you be our next National Plant Collection holder?

Our missing collections campaign asks people with a passion for plants to start a National Plant Collection of their own, and join Plant Heritage in growing, sharing and saving plants.

Thanks to this campaign, in recent years we have seen new collections coming through for *Baptisia*, *Eryngium*, *Verbena*, *Alcea*, *Ginkgo*, *Thalictrum*, *Tradescantia* and *Aeonium*.

There are even more plant groups to protect, so whether you're curious about plants, big or small, we are confident that there will be a plant group to suit your passion.

Malus 'Aldeburgh Beach', in the Suffolk Garden Plants collection

Plants without a current National Plant Collection:

- Armeria** Known as sea thrift or thrift
- Arbutus** Small trees or shrubs with red berries
- Argyranthemum** Large daisy-shaped flowers
- Campanula** Blue, white, pink or purple bellflowers
- Caryopteris** Fluffy blue-purple flowers
- Clethra** Also known as Summersweet
- Erysimum** Commonly known as wallflowers
- Festuca** Low-growing grasses
- Gaillardia** Known as Blanket Flowers
- Ligularia** Herbaceous perennials with daisy flowers
- Lysmachia** Related to Primula and Lythrum
- Paeonia (tree and species)** Shrubs with woody stems
- Pittosporum** Evergreen shrubs and small trees
- Potentilla (herbaceous)** A huge but recognisable genus
- Silene** Campion and catchfly, attractive to pollinators
- Troillus** Globe flower, related to Ranunculus
- Verbascum** Distinctive, popular herbaceous perennials
- Zantedeschia** Exotic-looking large fluted flowers

This list is evolving all the time so do check out the Plant Heritage website for the latest information on collections that need a home

Suffolk Plant Heritage Talks

Every year, Suffolk Plant Heritage hosts a series of talks at Wetherden Village Hall during the winter months. These talks cover a wide range of topics including plants, horticulture and botany featuring expert speakers from around the county and further afield.

Talks are open to Plant Heritage members and non-members and are a great opportunity to meet likeminded people and expand your knowledge of the wonderful world of plants.

Recent Speakers have included:

Derry Watkins
Special Plants

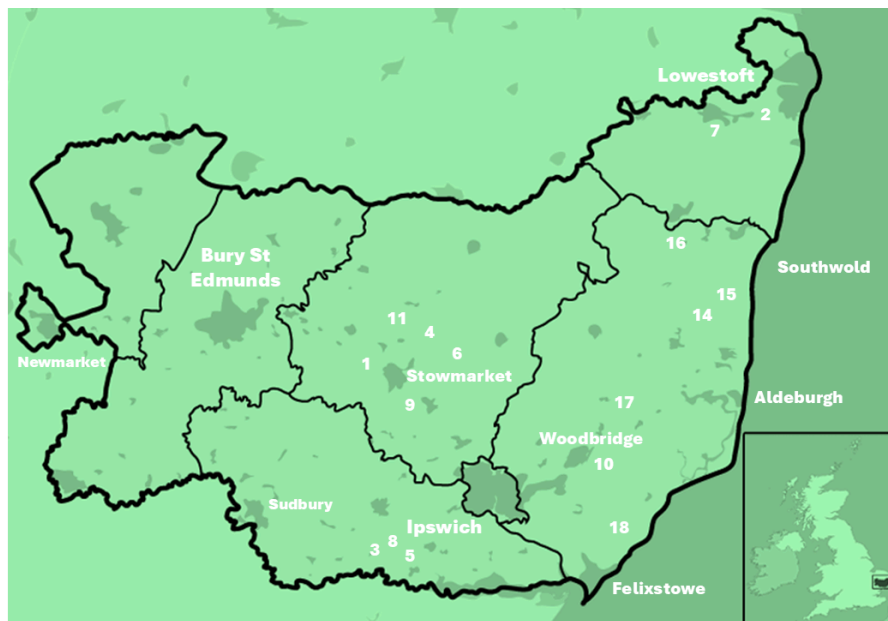

Tony Kirkham
Kew Gardens

Fergus Garrett
Great Dixter
